

Anirban Laha

Mila - Quebec AI Institute, 6666 St Urbain St, Montreal, Quebec H2S 3H1, Canada.

☎ (+1)514-691-5065 | ✉ anirbanlaha@gmail.com | 🌐 anirbanl.github.io | 📄 anirbanlaha | 🐦 anirbanlaha

Interests

Machine Learning, Deep Learning, Natural Language Processing, Natural Language Generation.

Education

Montreal Institute for Learning Algorithms (Mila), University of Montreal

Montreal, Canada

PHD CANDIDATE IN COMPUTER SCIENCE

Sep. 2019 - Present

- Courses: Probabilistic Graphical Models
- Advisor: Prof. Aaron Courville.

Indian Institute of Science (IISc), Bangalore

Bangalore, India

MS IN COMPUTER SCIENCE AND AUTOMATION

Jul. 2011 - Aug. 2013

- Courses: Machine Learning, Data Mining, Probability, Linear Algebra, Optimization, Game Theory. | Advisor: Dr. Shivani Agarwal.
- Thesis Topic: "Machine Learning and Rank Aggregation Methods for Gene Prioritization from Heterogeneous Data Sources". [Link](#).

Jadavpur University, Kolkata

Kolkata, India

BACHELOR OF COMPUTER SCIENCE AND ENGINEERING - 9.05/10

Jul. 2006 - Apr. 2010

- Final Year Project: "Solving the Single-Source Shortest Path Problem for Dynamic Graphs". | Advisor: Dr. Chandan Mazumdar.

Work Experience

IBM India Pvt. Ltd.

Bangalore, India

RESEARCH SOFTWARE ENGINEER

Nov. 2015 - Aug. 2019

- Projects:
 1. **Natural Language Generation (NLG)** - Applications of seq2seq methods for structured data summarization and query-based abstractive summarization; Sparse attention models for enhancing interpretability through explicit controls.
 2. **IBM Project Debater** - Led the deep learning based efforts. Sequence classification used for claim and evidence detection in argument mining; Punctuation and Case prediction for unformatted ASR output produced from human debate recordings.
 3. **Machine Learning for Creativity** - Story generation from incoherent descriptions; ML Framework for evaluating creativity.

Microsoft India R&D Pvt. Ltd.

Bangalore, India

APPLIED SCIENTIST

Aug. 2013 - Nov. 2015

- Project: Experimentation of new Click Prediction models for Ads Optimization in Microsoft Bing Ads for US and INTL Markets.
- Domain: Machine Learning, Information Retrieval, Ranking, Map-Reduce.

Amazon Development Center India Pvt. Ltd.

Chennai, India

SOFTWARE DEVELOPMENT ENGINEER

May. 2010 - Jul. 2011

- Project: Development of automated real-time scalable Pricing System for Amazon Kindle eBooks for markets like US, UK and DE.

Talks and Tutorials

- [28 Jul, 2019] Delivered half-day tutorial at ACL 2019. **Storytelling From Structured Data and Knowledge Graphs: An NLG Perspective**. Venue: Association for Computational Linguistics (ACL) 2019 in Florence, Italy. Details: [Link](#).
- [07 Mar, 2018] **Generating Natural Language Descriptions from Structured Data**. Venue: IBM Research-IISc Workshop on Knowledge and Learning on March 07, 2018 organised at IISc. Details: [Link](#).
- [20 Jan, 2018] **Tutorial on Natural Language Processing and Generation**. Venue: Technical Talk on the broader theme of 'Cognitive Analytics and NLP' as part of the annual science and cultural fest at IISc, Bangalore.

Awards and Achievements

- **Top 50% reviewer** in NeurIPS 2019 conference.
- IBM India **Distinguished Paper Award** for the year 2017 (for paper published at ACL 2017).
- Part of **IBM Project Debater** team which received news coverage for a **live debate** ([NYT](#) | [Forbes](#) | [The Guardian](#)).
- **RANK 1** in the selection interviews of IISc, Bangalore (2011) - [Link](#). | **All-India Rank 82** in GATE CS 2010 (out of 107086 - 99.92 percentile).
- **RANKED in Top-3** during BE in Computer Science department of Jadavpur University, Kolkata (2010).
- Awarded the prestigious **Jagadish Bose National Science Talent Search** Senior Scholarship in 2006.

- **Inventor of SIX patents** filed by IBM at the US Patents and Trademarks Office (USPTO).

Selected Projects

- **Controllable Sparse Alternatives to Softmax**: We study techniques for converting a real vector to a probability distribution. We propose a unified framework which leads to understanding of existing approaches incl. softmax. Our framework also enables providing explicit controls to vary sparsity of the output distribution. Our proposed convex loss functions enable achievement of greater sparsity for multi-label classification task. We also show encouraging results for sparse attention in NLG tasks. [NeurIPS '18 Paper](#).
- **Structured Data to Text Generation**: This can be categorized into two paradigms - (a) Supervised End-to-end attention based seq2seq approaches for summarization of tabular data ([NAACL '18 Paper 1](#), [Paper 2](#)), and (b) Unsupervised coherent description generation from tabular data, in a way that is scalable and adaptable to newer domains and does not require parallel data [CL '19](#).
- **Query-based Abstractive Summarization**: In this work, we propose a model for the query-based summarization task based on the encode-attend-decode paradigm with two key additions (i) a query attention model (in addition to document attention model) which learns to focus on different portions of the query at different time steps (instead of using a static representation for the query) and (ii) a new diversity based attention model which aims to alleviate the problem of repeating phrases in the summary. [ACL '17 Paper](#).
- **Sequence classification used for claim and evidence detection in argument mining**: We empirically evaluated multiple RNN and CNN architectures for bi-sequence classification and applied them for context-based claim and evidence detection. [COLING '16 Paper](#).
- **Punctuation and Case prediction for ASR output**: Automatic Speech Recognition (ASR) engines are good at recognizing words from human speech; however, the output from ASR needs to be formatted with punctuation and case to be useful for downstream NLP tasks. In this work, we employed a multi-task approach to simultaneously produce punctuation and casing labels for a stream of words. This solution enabled mining of claims and evidences from human debate recordings. [INTERSPEECH '17 Paper](#).
- **Story generation from incoherent descriptions**: We proposed the new task of generating a coherent story from disconnected text snippets. For this, we implement an RNN based encoder-decoder solution to produce comprehensive coherent story. [Paper](#).
- **ML Framework for evaluating creativity**: We identified important metrics for measuring creativity and proposed a regression-based learning framework for evaluating these metrics and combining them to produce a creativity score for an artifact. [Paper](#).
- **Gene Prioritization from Heterogeneous Data Sources**: In this work, we use graph-based learning-to-rank methods to learn a ranking of genes from each individual data source represented as a graph, and then apply rank aggregation methods to aggregate these rankings into a single ranking over the genes. | *Advisor*: Dr. Shivani Agarwal. [MS Thesis](#).
- **Investigation of the incentive compatible scoring rules for prediction markets**: We applied Prediction Markets in IISc Prediction League (to predict winners of DLF Indian Premier League 2012), an IISc-wide web application based on open-source Zocalo framework | *Advisor*: Prof. Y. Narahari. [Project Report](#).

Organizational Activities

- **PC member** AAAI 2020, NeurIPS 2019, ACL 2018-19, EMNLP 2019, COLING 2018 and **Reviewer** AAAI 2019, NeurIPS 2017-18, VLDB 2017.
- **PC member** of SIGKDD Workshop on Machine Learning for Creativity ([ML4Creativity](#)), 2017.
- **Co-organizer** of [TagMe 2014](#), a nation-wide Machine Learning Contest (organized by IISc Bangalore and Microsoft).
- **Lead Organizer** of [TwitMiner 2013](#), a nation-wide Machine Learning Contest (organized by IISc Bangalore and Amazon.com).
